Qs about your future - tangibles

- **Anyone interested in studying further after this degree?**
- **Started but not yet finished your career research, or found sth you think you will like?**
- **Hands up if you have not yet started your career research?**
- **Hands up if you have 'discovered' the job/career you want?**
- **And if you have been offered an opportunity to do that?**
- **Hands up if you have been offered a different graduate job to one you feel is ideal for you?**
- **And if, during your degree, you have undertaken any kind of internship/work experience?**
- **If you have applied but not yet been offered a role?**

Qs about the future –

- **When you think of the next step after UoW – what image comes to mind?
A feeling? Image? Sth specific?**
- **What do you feel you can take with you from your time here?**
- **What tips can you offer those unsure about their ‘what next’?**

Useful tools?...

- **Mindset?**
- **Contacts?**
- **Skills?**
- **Attributes?**
- **1st step?**
- **2 years support from UoW careers service**

Remote working

Undertaking a remote working internship

Within these unprecedented times, many organisations and workers will be finding ways to adapt to remote working. This type of work is also growing due to the suitability of office roles, technology available, pressure on business for office space and the desire of employees for flexible working. [According to ACAS](#) the number of people working from home is steadily increasing, with 4.2 million in 2014, who spend at least half their time using their home as their place of work.

If you are wondering about taking part in a remote working internship, this guidance page can support you in considering this way of working, how you can make the most of your own resources, the internship itself, and working with your manager and team from a distance.

If you lack experience of working in an office, remember that many other workers will be in a similar situation of experiencing the challenges of learning to work virtually. If it helps, think about how you have worked collaboratively in teams as part of your studies, research you have undertaken, the technology you have used to support this and how you managed your time and motivation to complete this work. These are the skills and behaviours you will now be drawing upon to support you in working from home.

This guide is based on the Internships Development Team's experiences of running the Warwick

Starting the Job

I'm entering my penultimate year at university...

Share

🕒 3 min read

Get prepared over the summer

Before you start your penultimate year, it's a good idea to start researching different industry sectors and employers; the [Gradcracker Toolkit](#) is a good place to begin. From this you can gather an idea of the types of career paths you might like to explore further – perhaps through a placement.

Use our [Company Hubs](#) to find your favourite employers and start building your Follow list to receive job alerts from companies you'd particularly like to work for. If you're hoping to complete a summer or year-long placement, this will ensure you don't miss out on any of the year's action!

Sandwich students, get ready

Some students will have the opportunity to complete a [year-long placement](#) between the penultimate and final year of their studies. If this applies to you, you'll want to start applying to opportunities from the Autumn of the year before you intend to start your placement. (This will most likely be your second year at university.)

Reflect on what you'd like to achieve this year.

Last calling for summer interns

The summer after your penultimate year will be your last opportunity to complete a [summer internship](#) as an undergraduate. As with year-long placements, you'll want to be applying to opportunities from the Autumn. This is a particularly good year to gain some work experience, as there's a chance you could secure a full-time position with the company for when you graduate.

Set yourself some objectives

If you are planning on getting some work experience in the next year or so, I'd recommend having a think about what you'd like to get out of it. Perhaps there's a certain skill you'd like to develop, or a topic you'd like to learn more about. Going into your placement/internship with an idea of what you'd like to achieve will help you get the most out of the experience.

Equally, there are plenty of other ways that you can progress aside from work experience. What can you do to take your understanding to the next

Also tick the 'Sectors' you wish to research

The screenshot shows the targetjobs website interface. At the top, there is a search bar with the text "Search jobs & opportunities" and a magnifying glass icon. To the right of the search bar are links for "Log in" and "Register". Below the search bar, there are several navigation tabs: "Search jobs", "Internships" (highlighted with a red box), "Careers advice", "Events", "Employers", and "Further study". Underneath these tabs, there is a section for "I'm looking for..." with a dropdown menu currently set to "Jobs & opportunities". To the right of this dropdown are buttons for "Type", "Organisation", "Sectors", "All filters", and "Reset". The main content area displays a list of job opportunities. The first listing is for "2023 Industry Placement Year | Economic & Financial Consulting" by FTI Consulting, with a "4 days to apply" badge. The second listing is for "Global Research Internship..." by Bank of America, marked as "FEATURED" and with a "6 days to apply" badge. The third listing is for "Multi Asset Summer Internship 2023 - London" by Fidelity International, with a "6 days to apply" badge. The fourth listing is for "Fixed Income Summer". On the right side of the page, there is a detailed view of the "2023 Industry Placement Year | Economic & Financial Consulting" listing, showing the company logo, name, and a "Follow" button. Below this, there is an "Apply" button and an "Employer info" button. The text "Placement" is visible, followed by the heading "What We Do" and a paragraph describing the team's background and specialization.
