Yes	Strongly Agree	Strongly Agree	Strongly Agree	Strongly Agree	I enjoyed the mini quizzes - this was a good way of testing where the group was at quickly so we could focus on the areas that we didn't understand as well. It was also useful to have someone talk through the reasoning behind each step of the exercise questions in order to build intuition.	It may be useful to ask which assignment questions people wanted to look at before the session so we could focus on these during the tutorials.	I have really enjoyed the tutorials for this module and felt they supplemented my learning well. They were very beneficial in cementing ideas by going over things that has been covered and reiterating the key points. I really appreciated all the effort that went into the sessions and found them very useful!
