

Warwick Centre for Industrial Biotechnology and Biorefining

Launch Event 21st March 2013

University of Warwick
International
Manufacturing Centre

We aim to be an internationally leading research organisation in biotechnology. We provide opportunities to large and small businesses through our unique collection of expertise across the full range of industrial biotechnology areas, from **plant science** and **genetics**, through **biochemistry** and **fermentation**, to **product synthesis** and **manufacturing** and have facilities in the four departments of Chemistry, Engineering, Life Sciences and the Warwick Manufacturing Group.

Programme for the day
