Data-Driven Museums

Alice Daish

Data Scientist, British Museum

Thursday, June 8

3:00 PM

A1.01 Zeeman Building

How do you transform a traditionally un-data-orientated business into being data-driven armed with R, data science processes and plenty of enthusiasm? Alice Daish shares her experience of transforming the 250-year-old British Museum to be data-driven by 2018.

Alice Daish is the Data Scientist at The British Museum focusing on making the museum data-driven by 2018. She co-founded R-Ladies Global and is a mentor at R-Ladies London. Trained in ecology and quantitative biology, Alice is a Registered Scientist. Her interests include data science leadership and transformation, R and data science, datafication and gender diversity in STEM.
