

Student-led Projects- Outreach 2022-2023

Marie Diebolt - M.L.Diebolt@warwick.ac.uk

The project

UniExplorer 2023

The WMG Outreach team supports in collaboration with the High Value Manufacturing Catapult, the School of Engineering Student Led-Projects and provides them with training and opportunities to deliver outreach and public engagement activities to inspire the next generation of engineers.

Industry Day 2023

Key achievements and strengths

11 students
fully trained

3 Teams delivered
their outreach
activities in 2022-23

All the outreach work is now captured on a webpage highlighting the impact of the project.

They inspired and interacted with over **350 local school students**

Student-led outreach offers young people **role models and gives them an authentic experience** of what it is like to study engineering

Plans for next academic year

Consult with the School of Engineering and Catapult to identify criteria for a successful outreach portfolio.

Identify a set of outreach events that students are supported with and expected to take part in.

Recommendations for 2023-2024

- 1** Increase the collaboration with the School of Engineering and the Catapult with regular stakeholders meetings.
- 2** Organise a full set of 4 training sessions in October to support students developing and finalise their activity.
- 3** Link the Catapult funding to the delivery of outreach events.
