Sustainable Production Innovation Network (SPIN) Cohort
A cohort will bring together manufacturing businesses to:

- gain knowledge
- implement change
- grow their business

through sustainable manufacturing practices.

How does it work?

WMG is teaming up with a large business and a partner organisation to collaborate with 5 or more SMEs creating a network of people dedicated to helping each other become more sustainable in manufacturing.

The business will support SMEs at collaborative workshops to build a sustainability road map. The SMEs will work closely with the large business and WMG experts through collaborative workshops and innovation projects. The partner organisation will carry out energy surveys and support access to grants for energy efficiency improvements.

What do you get out of it?

- Innovation Project
  Work with WMG to introduce technical innovation to your business for a positive impact on both environment and profit
- Collaboration Events
  Collaboration events with experts speakers and workshops on sustainability topics relevant to the sector
- Net Zero Readiness Assessment
  Online tool to assess how your business is prepared to meet net zero greenhouse gas emissions targets
- Road Map
  With the cohort, generate a 10-year roadmap with an action plan for your business to capitalise on further opportunities
- Best Practice Visit
  Observe sustainability innovations in practice at UK manufacturing businesses

What do you put in?

- SMEs will commit 20 hours to events, collaborative networking, and project scoping.
- Large businesses will dedicate 10 hours supporting the cohort.
We're looking for manufacturing SMEs
Must be enthusiastic and keen to embrace sustainable manufacturing
There are opportunities to access ERDF funded projects if within region
