Module Requirements for Sustainable Automotive Engineering

Candidates for the MSc will be required to take 180 credits overall to include modules equivalent to at least 50 credits from the Required list, as well as a dissertation project.

Candidates for the Postgraduate Diploma will be required to take 60 module credits, with at least 50 credits from the Required list, as well as a dissertation project considered by an Exam Board to be a pass at Postgraduate Diploma level.

Candidates for the Postgraduate Certificate will be required to pass 60 credits, with at least 50 credits from the Required list.

Candidates for the Postgraduate Award will be required to pass 30 credits from the Required list.

Definition of terms:

- Core: students must pass the module (50% or above)
- Optional core: students must take the stated proportion of modules from this list and must achieve a pass (50% or above).
- Required: students must achieve mark of 40% or above on the module
- Defined Elective: students must take the stated proportion of modules from this limited list
- Optional (elective) modules: students may take any remaining credits from this list after satisfying the list requirements outlined above
- Students are still required to achieve the stated amount of passed credits and credits failed in the 40s for award as per General PGT Regulations page

19/20: Sustainable Automotive Engineering – UK Full Time MSc Programmes			
	Module Code	Module Name	Credit
Dissertation	ES928	MSc Dissertation	90
Required list	WM068	Automotive Hybridisation and Electrification	10
	WM00G	Lightweight Materials and Structures	10
	WM075	Energy Storage and High Voltage Automotive Systems	10
	WM053	Systems Modelling and Simulation	10
	WM086	Propulsion Technology for HEV Applications	10
Optional (elective) modules	WM908	Fundamentals of Computing and Programming (recommended for students without a significant background in computer science) Select from WMG's portfolio of modules offered on the full time programmes. Subject to availability, restrictions, prerequisities and suitability as indicated http://www2.warwick.ac.uk/fac/sci/wmg/ftmsc/modules/modulelist	10

Students may apply to the Programme Management for exemptions from specific modules, and, if granted, must select an alternative appropriate elective module to comply with the module requirements for the course. Modules listed under other WMG modular master's degree regulations may be available to candidates for these

awards as a replacement for those listed above, subject to approval by the Director of Studies.

WMG, International Digital Laboratory (IDL), University of Warwick, Coventry, CV4 7AL, United Kingdom
