The Bridges Leverhulme Programme and the ESRC Centre for Competitive Advantage in the Global Economy present

**Bridges/CAGE Summer School 2019**

12–13 September 2019
Palazzo Pesaro-Papafava, Venice, Italy

Behavioural economics has produced influential and sometimes surprising insights into human decision-making, ranging from financial decision-making to well-being. The aim of this summer school is to provide participants with an interdisciplinary forum for discussing these contributions. The workshops are led by researchers who apply the tools of behavioural economics to unique contexts. The summer school will be a cross-disciplinary event open to researchers from all fields who are interested in behavioural economics.

**Pavitra Govindan**
University of Utah
“Recent developments in the field of social norms”

**Redzo Mujcic**
University of Warwick
“New developments in well-being research”

**Theresa Kuchler**
NYU Stern
“How biases and beliefs shape financial decision-making”

**Henrik Singmann**
University of Warwick
“An Introduction to the Diffusion Decision Model for Modelling Binary Responses and Associated Response Times”
