Comments

The seminar tutor this term was really helpful and helped me to understand some material. He was well prepared and made sure to give review the confusing material before we approach certain questions. He always answered my questions. I found all my office hours really useful with him. I think the seminars should be designed in such a way that allows students to be given a recap of the week's material and clear any doubts that students have with the topic (assume that students do not understand everything covered in the lectures and build it up from there).

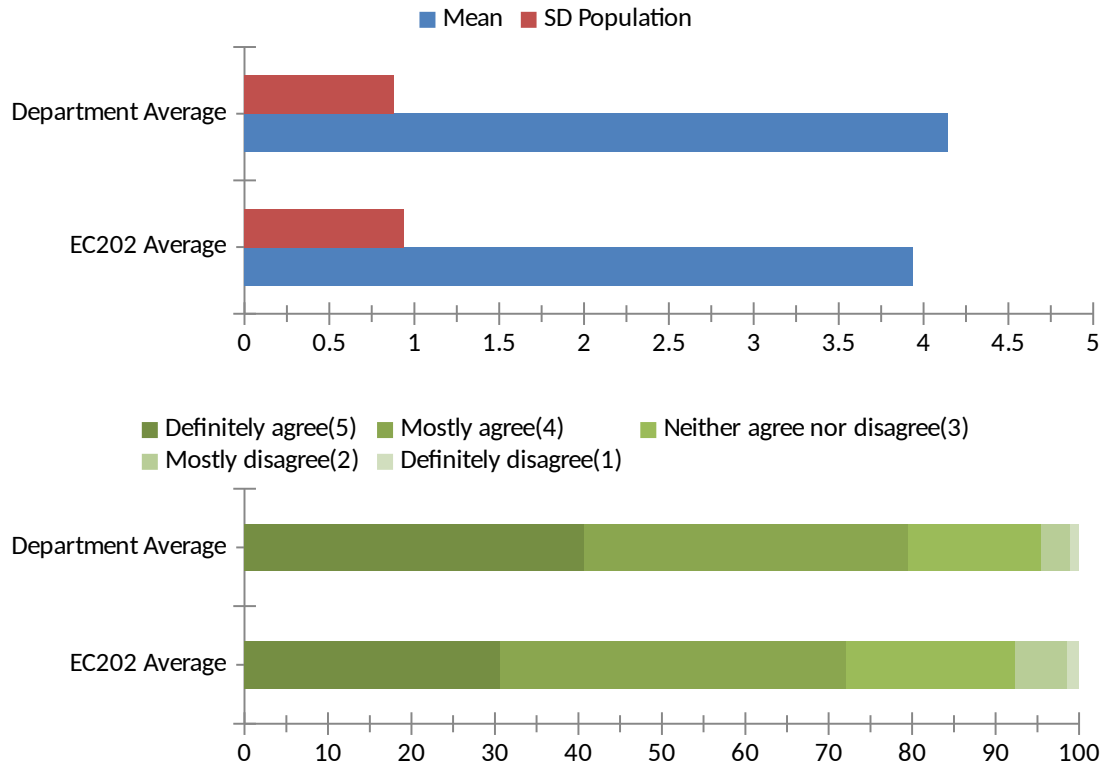

I'd prefer if the tutor would go through a summary of the week's content and go through questions a bit more effectively and step-by-step.

He explains the math to us step by step.
