Factories and shipyards: a numbered list, version 2.0

Sources

Preface

Since the publication of Part I of our project in February 1999 much additional information has been published in books and magazines and more archives in Moscow have been studied. Version 2 of “Factories and shipyards” is in the same format as the first but incorporates this new data thus extending the list from 789 to 1347 rows.

We welcome comments and corrections which should be addressed to The.Dexters@virgin.net.

Additional information is welcomed, but must be fully referenced if it is to be incorporated into future editions.

Additional author

The three authors of version 1 are delighted to introduce a fourth contributor: Ivan Rodionov, PhD is an independent researcher and writer and the author of *Rodionov's Chronology*, a comprehensive annual survey (in Russian) of Russian and Soviet aviation from 1916 to 1946.

This work is to be found at:

www.airforce.ru/history/chronology/index.htm

and has so far progressed to mid-1939. An older but complete version of the *Chronology* is at:

<http://www.aeroweb.lucia.it/~agretch/Chronology>

All errors of fact, interpretation, and omission, that are sure to be present in a work of this nature, are the responsibility of the authors alone.

Acknowledgements

In addition to those people acknowledged in version 1, the authors wish to express their gratitude to Marina Korzina whose research in the Russian State Archives in Moscow has been invaluable.
