

STEM Careers Learning Module

This module brings together a wide range of resources as an online learning tool focused around careers awareness of science, technology, engineering and mathematics (STEM) and labour market information (LMI).

The development arose from a commitment by the Centre for Science Education at Sheffield Hallam University and their partners Babcock Careers Management following three years' work on the STEM Subject Choice and Careers project funded by Department for Education.

Aimed at:

- Teachers
- Careers guidance professionals
- Careers co-ordinators
- Tutors and mentors involved in CEIAG

Includes:

- Self-assessments
- Labour market information
- Teaching aids
- Downloadable resources
- Interactive materials
