INVITATION

PRESENTATION OF RESULTS FROM THE HORIZON 2020 PROJECT QUINNE-

QUALITY OF JOBS AND INNOVATION GENERATED EMPLOYMENT OUTCOMES

AGENDA

Opening remarks

A brief overview of the central issues–
Chris Mathieu (Lund University)

Quantitative findings on the relationships between innovation, job quality and employment at the national, firm and individual levels–
Mathilde Guergoat- Larivière (CNAM, Paris)

Qualitative findings about the relationships and mechanisms by which job quality, innovation and employment impact each other: evidence from the aerospace, automotive, banking, computer games, healthcare, and retail logistics industries–
Koene, Mathieu, Illéssy and Warhurst

Policy recommendations–
Chris Warhurst (University of Warwick)

Improving innovation and job quality: the QuInnE tool package–
Bas Koene (Erasmus University, Rotterdam)

Questions and comments

Does innovation produce more and better jobs?

Does innovation combat or exacerbate inequalities?

What aspects of job quality facilitate innovation?

How does negative job quality inhibit innovation?

Does the relationship between innovation and job quality operate differently in different industries and under different institutional regimes?

What can the EU, national governments, firms and organisations do to promote job quality and innovation simultaneously?

These questions have been addressed by the QuInnE project from 2015-2018, and the findings, conclusions and recommendations will be presented on:

26 September 2018, 15.00 – 17.00

Location: COV2 19 SDR1, Covent Garden 2, Place Rogier, B-1049 Brussels/Belgium

QuInnE.eu

Please register before 19 September, by email to:
Susanne.boethius@soc.lu.se

For admission to the building, please include your name, institutional affiliation, date of birth, nationality, ID card number, and ID validity date when you register.

WELCOME!
