CALL FOR PROPOSALS

TITLE: THERE IS NO APP FOR THIS!
Exploring ideas for better solutions in m-health to address migration of health apps data

Many health app developers knowingly or unknowingly sign away the rights to the data collected by health apps at the development stage. This project calls for proposals and ideas into how we can change this to better protect personal data from falling into the wrong hands during the development and use of digital health apps.

SUBMIT YOUR WINNING IDEA FOR A CHANCE TO BE SELECTED TO TAKE PART IN A HACKATHON EXPLORING THE FOLLOWING THEMES:

<table>
<thead>
<tr>
<th>THEMES:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Theme 1: Encryption and security</td>
<td>Techniques that can aid to protect patients' health data when it is shared or transmitted between systems.</td>
</tr>
<tr>
<td>Theme 2: User authentication and authorization</td>
<td>Innovations that will tackle controlling access to sensitive health information on m-health platforms.</td>
</tr>
<tr>
<td>Theme 3: Integration</td>
<td>How to mitigate interoperability challenges when m-health platforms are merged with legacy (old) healthcare systems.</td>
</tr>
<tr>
<td>Theme 4: Innovations in telehealthcare</td>
<td>How to ensure data privacy and information security in the era of provision of e-health services</td>
</tr>
</tbody>
</table>

PRIZES:

1st Place
- €1000 prize money
- Paid hosting for a cloud application for 12 months
- Mentorship and coaching
- A laptop for winning team/individual

2nd Place
- €750 prize money
- Paid hosting for a cloud application for 6 months
- Mentorship and coaching
- A smartphone for winning team/individual

3rd Place
- €500 prize money
- Mentorship and coaching
