Blackboard Collaborate

Although the Mobile App for use with Blackboard Collaborate on a mobile device is great, we recommend where possible you use a PC or MAC when attending a live webinar. There are some features that are regularly used during the live webinars that aren't yet available via the App.

Please see the table below for quick a comparison:

Blackboard Collaborate feature:	PC or MAC	Mobile Device
Listening to other speakers and speaking to the room	Yes	Yes
Live Video	Yes	**No**
Responding to polls	Yes	Yes
Viewing the Whiteboard	Yes	Yes
Sending and receiving chat messages with the entire room	Yes	Yes
Private Chat	Yes	**No**
Moderator Controls	Yes	**No**
Viewing an Application on another user's desktop	Yes	Yes
File Transfer	Yes	**No**
Multimedia Library	Yes	**No**
Annotation on the Whiteboard	Yes	**No**
Access to breakout rooms	Yes	Yes
Recording Playback	Yes	**No***
Localizations	Yes	**No**

*Although recordings of wbsLive sessions cannot be viewed via the Blackboard Collaborate App, we do provide recordings in MP4 format that can be viewed on mobile devices, these can be accessed by logging into my.wbs via a browser (e.g Safari) on your mobile device.
