The Gillmore Centre for Financial Technology

Established by Warwick Business School using a £3 million donation from Clive Gillmore, founder and Group CEO of Mondrian Investment Partners.

Vision:

- To conduct world-class, cutting-edge research at the intersection of finance and technology that has the transformative potential to impact theory, policy and practice.

Mission:

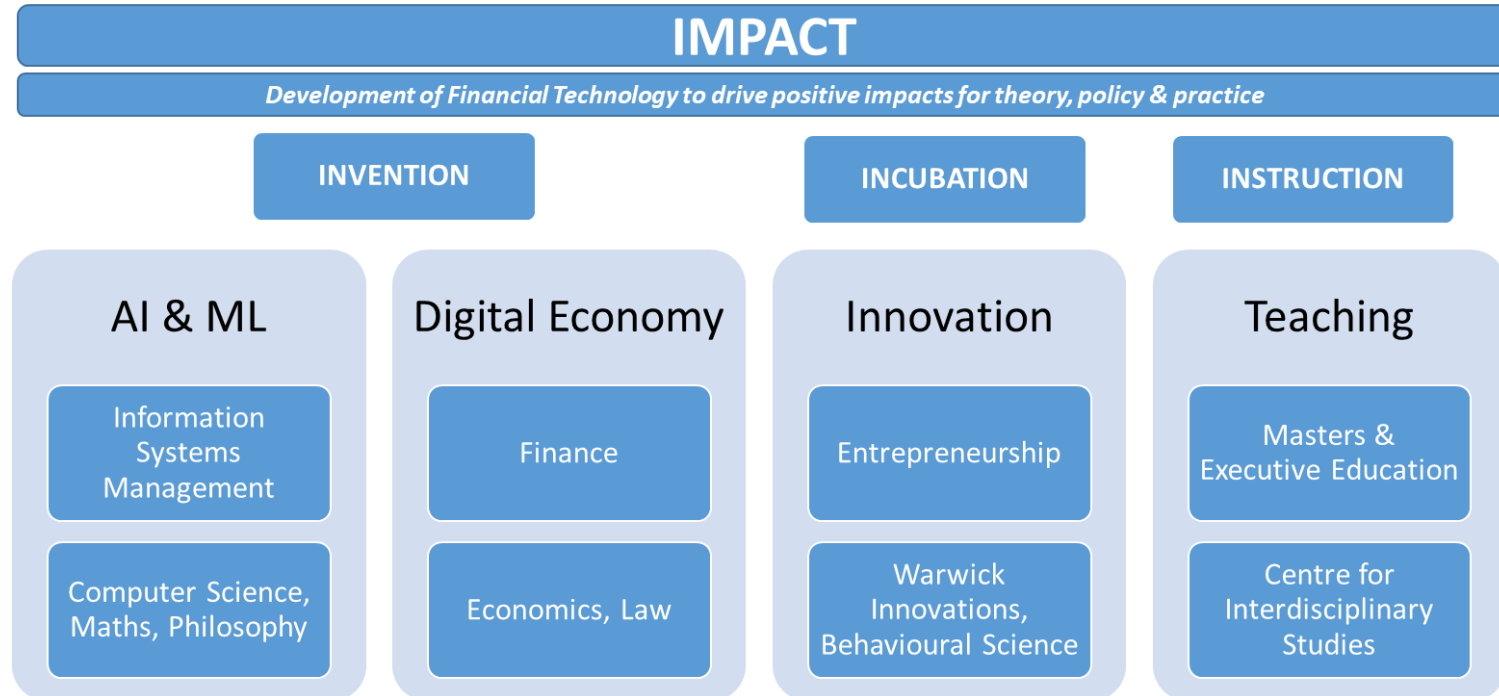

- To become an effective contributor and thought leader to stakeholders in the fintech sector.

Imperative:

- World-class, cutting-edge research will inform new educational initiatives for undergraduate, postgraduate and executive programmes to meet the skills needs of the fintech sector

WITS Workshop on Information Technologies and Systems

About WITS

WITS was conceptualized in 1991 by Richard Wang (MIT) and Dr. Sudha Ram (University of Arizona). Subsequently, the first conference was held on December 14th in Boston and co-chaired by Richard Wang and Sudha Ram. Also, involved in the early conferences were Sal March, Prabuddah De, Al Hevner, Stuart Madnick, Veda Storey, Diane Strong, Andy Whinston, Carson Woo, and others.

Philosophy

The WITS community is focused on addressing complex business problems or societal issues using current and emerging information technologies. We also encourage research that can change the way information technology functions (e.g., by designing, modifying, or constructing systems) so that they can better solve real-world problems. All problem-solving paradigms – including empirical, analytical, behavioral, experimental, and computational – are invited. Integrative approaches, whether methodological or functional, are welcome. WITS research is often *prescriptive* (toward providing a solution to a problem), rather than *descriptive* (explaining a phenomenon), unless the explanation clearly helps in developing a solution. We particularly invite work that is early, but has the potential to make a significant impact – innovation and novelty are at least as important as completeness and rigor.

Agenda

Industry Day – Friday 17th March

- 11:00 - 11.10 – Welcome and opening remarks
- 11.10- 13.15 - **Session 1** – Future of Digital Currencies Post FTX
