How to Participate.

The contest is open to students enrolled in one of the invited Universities during the academic year 2012-2013, from any grade, but excluding Phd students. The contest requires a good command of English both orally and in writing. Each University will be able to present as many teams as they want.

1 **Read the IT Challenge rules carefully**

2 **Create an account via the "Join the competition" section on http://atositchallenge.net**
Register your team composed by a minimum of 2 members and a maximum of 5.

3 **Find a brilliant concept about Connected Cars and submit your idea.**
Once your idea has been validated you won't be able to modify it.

Connected Car

For the 2013 edition, we'd like you to focus on Connected Cars. An App which provides "Well-being on the move" by enhancing the whole driving experience through an innovative app which offers drivers and passengers a host of new features, think of it as a on the move continuum both in and out of the car.

An amazing reward program !

Become part of this challenging competition and you could win a once in a life experience! We are offering winners the opportunity to win internships and a trip to Sochi to see the Sochi 2014 Olympic Winter Games.

Registration Deadline:
17/01/2013

Please register and access the competition portal for more information. Further enquiries to **sarah.paul@atos.net**

Entry Deadline:
24/01/2013

Multilens, winning team of the Atos Global IT Challenge 2011/2012

MultiLens in it's simplest shape is a multi angle video streaming app. This app points itself towards events. On these events it's allows the user to view this event from different points of view, no matter where the user is.
