

# saving **lives** with The Anthony Nolan Trust

Could you donate your bone marrow, and save the life of someone suffering from leukaemia or a severe immune deficiency disease?

if **you** are: aged 18 – 40 and in good health,  
weigh over 8 stone, **willing** to **help** ANY patient...  
(We are particularly in need of young donors, males and donors from all ethnic minority groups)

...then we need **you** to join  
The Anthony Nolan Trust  
register of potential bone marrow donors  
(a small 4ml blood sample will be required to join)

If chosen as a match, the donor has the choice of donating blood stem cells either from the bloodstream, or from the bone marrow, which is removed under general anaesthetic. The Trust pays all expenses, and loss of earnings during the short recovery period.

Come along to our  
**Donor Clinic** on:

**Saturday 26th November 2005**

At: **The Abbey Medical Centre,  
42 Station Road, Kenilworth,  
Warwickshire, CV8 1JD.**

Working in conjunction  
with and supported by  
Kenilworth Round Table.

Times: **1pm - 4pm**

The **ANTHONY  
NOLAN** Trust   
*Taking back lives from leukaemia*

Charity Reg No: 803716
