

Royal Society of Chemistry Tilden Prize Winner

Professor Dermot O'Hare

*Department of Chemistry,
University of Oxford*

Will deliver a seminar:

“New Breakthroughs in Layered Double Hydroxide Chemistry”

The talk will describe the synthesis of ultra high surface area and dispersible Layered Double Hydroxide (LDHs) and core@LDH hybrid materials. These materials can be used as catalysts, catalyst supports and as nano additives in polymer systems.

16th February 2017

4 pm

PLT Lecture Theatre, Science Concourse

Tea & Coffee will be available from 3.45 pm

Wine reception from 5 pm on Science Concourse
