	essment of the insta	<u> </u>			TODY
continued u	se*:		_	SATISFAC	
	sfactory assessment ave been identified	_	gerous (Code C1) and/or	potentially dangerous (	Code C2)
	MMENDATIONS				

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by:

5

5 Years or change of tenant/owner

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.

~	There are no items adversely affecting electrical	safety or

Page: 2 of 8

This form is based on the model shown in Appendix 6 of BS 7671:2018.

OBSERVATIONS AND RECOMMENDATIONS FOR ACTIONS TO BE TAKEN

of this report under 'Extent of the Installation and Limitations of Inspection and Testing':

Referring to the attached schedules of inspection and test results, and subject to the limitations specified on page 1

## GENERAL CONDITION OF THE INSTALLATION

General condition of the installation (in terms of electrical safety):

The majority of the installation is wired to the 16th edition of BS 7671 with some upgrades. After completing the remedial actions this installation is safe until next reccomended date of inspection and test.

I/We, b signature inspection	eing the s belowed and to and to and to and to an accumum 4 of the second secon	ATION the person(s) r v), particulars the pesting, hereby thate assessm this report. 14/IN	ISPECTION SCHEDULE FOR DOMESTIC AND SIMILAR F	PREMISES WITH UP TO 100A	Α
Item	Description	Comments	Outcome
4.15	Single-pole switching or protective devices in line conductor only (132.14.1; 530.3.3)	N/A	~
4.16	Protection against mechanical damage where cables enter consumer unit/distribution board (132.14.1; 522.8.1; 522.8.5; 522.8.11)	N/A	~
4.17	Protection against electromagnetic effects where cables enter consumer unit/distribution board/enclosures (521.5.1)	N/A	~
4.18	RCD(s) provided for fault protection - includes RCBOs (411.4.204; 411.5.2; 531.2)	N/A	~
4.19	RCD(s) provided for additional protection/requirements - includes RCBOs (411.3.3; 415.1)	N/A	~
4.20	Confirmation of indication that SPD is functional (651.4)	N/A	N/A
4.21	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure	N/A	~
4.22	Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6)	N/A	•
4.23	Adequate arrangements where a generating set operates in parallel with the public supply (551.7)	N/A	•
5.0	FINAL CIRCUITS		
5.1	Identification of conductors (514.3.1)	N/A	<b>✓</b>
5.2	Cables correctly supported throughout their run (521.10.202; 522.8.5)	N/A	<b>✓</b>
5.3	Condition of insulation of live parts (416.1)	N/A	<b>✓</b>
5.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1)	N/A	<b>✓</b>
5.4.1	To include the integrity of conduit and trunking systems (metallic and plastic)	N/A	~
5.5	Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	N/A	~
5.6	Coordination between conductors and overload protective devices (433.1; 533.2.1)	N/A	<b>'</b>
5.7	Adequacy of protective devices: type and rated current for fault protection (411.3)	N/A	•
5.8	Presence and adequacy of circuit protective conductors (411.3.1; Section 543)	N/A	<b>✓</b>
5.9	Wiring system(s) appropriate for the type and nature of the installation and external influences (Section 522)	N/A	<b>✓</b>
5.10	Concealed cables installed in prescribed zones (see Section 4. Extent and Limitations) (522.6.202)	N/A	<b>✓</b>
5.11	Cables concealed under floors, above ceilings or in walls/partitions, adequately protected against damage (see Section 4. Extent and	N/A	•
5.12	Provision of additional requirements for protection by RCD not exc	ceeding 30mA:	
5.12.1	For all socket-outlets of rating 32A or less, unless an exception is permitted (411.3.3)	N/A	•
5.12.2	For the supply of mobile equipment not exceeding 32A rating for use outdoors (411.3.3)	N/A	~
5.12.3	For cables concealed in walls at a depth of less than 50mm (522.6.202; 522.6.203)	N/A	~
5.12.4	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)	N/A	~
5.12.5	Final circuits supplying luminaires within domestic (household) premises (411.3.4)	N/A	~
OUTCOM Acceptal condition	ble TLCK Unacceptable C1 or C2 Improvement C2 Further	verified N/V Limitation LIM appli	ot N/A

## DOMESTIC ELECTRICAL INSTALLATION CONDITION REPORT GUIDANCE FOR RECIPIENTS

(to be appended to the Report)

This Report is an important and valuable document which should be retained for future reference.

- 1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section 5). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger.
- 2. The person ordering the Report should have received the 'original' Report and the inspector should have retained a duplicate.
- 3. The 'original' Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.
- 4. Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested six-monthly. For safety reasons it is important that this instruction is followed.
- 5. Section 4 (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
- 6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section 4
- 7. For items classified in Section 7 as C1 ('Danger present'), the safety of those using the installation is at risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.
- 8. For items classified in Section 7 as C2 ('Potentially dangerous'), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.
- 9. Where it has been stated in Section 7 that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated without delay. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section 6).

  10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a
- 10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The recommended date by which the next inspection is due is stated in Section 6 of the Report under 'Recommendations' and on a label at or near to the consumer unit/ distribution board.
