Sustainability: The Way Forward...

Warwick Conferences is on a journey to become more sustainable and make a positive impact in the world. Our goal is to reduce any negative effect our business may have on the environment. We are aligned with the University's Way to Sustainable strategy.

Timeline for Decarbonisation:

- ✦ By 2030: Eliminate carbon emissions from our direct operations and the energy we purchase
- ✦ By 2050: Achieve full decarbonisation across our operations and value chain, covering both direct and indirect emissions
