Warwick Conferences is on a journey to become more sustainable and make a positive impact in the world. Our goal is to reduce any negative effect our business may have on the environment. We are aligned with the University’s Way to Sustainable strategy.

**Goals: What we will achieve**

- Net zero carbon emissions from direct emissions and the energy we buy by 2030
- Net zero carbon for both direct and indirect emissions by 2050

**Energy**

- 100% electricity from renewable sources
- Our heating systems will be net zero carbon by 2030
- Reduce energy use by 5% a year across conference centres

**Food & Drink**

- 75% of our menus will be carbon rated green by 2024
- Procure MSC-certified sustainable fish and satisfied UK welfare standards for meat
- Re-use coffee grounds as compost across the campus and offer these to our guests for their own gardens
- Ensure all new builds are built to BREEAM and net carbon zero, just like The Slate

**Transport & Mobility**

- Replace our vehicle fleet to electrical by 2030
- 182 electric charging points across the University campus
- 22 electric charging bays at our venues including 2 rapid chargers by the end of 2023/24
- Replace our vehicle fleet to electrical by 2030
- Encourage green travel by promoting travel options to our easily accessible centrally located venues

**Reduce Waste**

- Reduce use of water by 5% year on year
- Encourage “Skip My Room Clean”
- 22 electric charging bays at our venues including 2 rapid chargers by the end of 2023/24
- Food waste is collected for anaerobic digestion
- Zero waste to landfill

**Construction, Maintenance and Repair**

- Improve energy efficiency rating on new equipment
- Reuse, Recycle, Upcycle old furniture
- Support campus initiatives such as the 48+ hectare public ecopark
- Continue to enhance the campus for biodiversity/wildlife, including planting 500 trees on site at Scarman

**Ecology and Biodiversity**

- 500 trees
