Ranking and quarter methodology

The quarters and ranking are based on all institutions that have, on average, 23 valid responses or over to the questions making up the survey area. Ranking and quarters are only reported when there are a minimum of 8 institutions within an area.

Where a ranking or quarter position is starred (*) then it is significantly different from the average (mean score), for that breakdown. This indicates that there is less than 5% chance it is a random difference.

For more on how the quarters have been calculated, please refer to the statistics guide in the 'Guides' workbook supplied alongside this report
