MINUTES

37/02-03 Minutes

RESOLVED:

That the minutes of the meeting of the Board of the Faculty of Science held on 5th February 2003 be approved.

38/02-03 Matters Arising on the Minutes

(a) Faculty Information Technology Committee (minute 26/02-03 refers)

REPORTED:

That at the last meeting of the Board it was resolved:

That the support for the audio visual equipment in lecture theatres seemed very low with too high a frequency of breakdown and that the appropriate member of ITS be invited to the next meeting of the Board to discuss the issue of support and service of equipment in lecture theatres.

RECEIVED:

An oral report from a representative of ITS on the quality of the infrastructure to support teaching in lecture rooms including issues such as network and server reliability and speed, noting the following:

- (i) That the replacement network being deployed as part of the campus network project will improve reliability.
- (ii) ITS are working on new mechanisms for application delivery which should be faster and more reliable than the current mechanisms, particularly for larger and more complex applications, though these are not going to be available until a migration to Windows XP is made on the desktop.
- (iii) As an interim solution, ITS will, over the summer, migrate as many of the lecture room PCs to a dual-boot configuration, where one can operate the machine as either a conventional 'managed desktop' with all applications available or in a 'standalone' mode with only a web browser and basic productivity software (including Powerpoint).

(b) Periodic Review reports (minute 21/02-03 refers)

REPORTED:

That the Board of Undergraduate Studies on 6 June 2002 considered the review of Computer Science and Computer Systems Engineering and the department's responses and resolved:

- (i) That the Computer Science and Computer Systems Engineering Periodic Review report (paper BFS29/01-02), be approved.
- (ii) That the formal response to the Computer Science and Computer Systems Engineering Periodic Review report from the Department of Computer Science be revised to include further details of the steps that will be taken to implement the recommendations of the report and a suggested time frame in which they will be carried out.

and that the Academic Quality and Standards Committee on 12 June considered these and resolved:

- (i) That the report as set out in paper BFS29/01-02 be approved.
- (ii) That it was the view of the Committee that the Department's response to the report was inadequate as a statement of how the Department intended to address the issues and recommendations raised in the report.
- (iii) That the Committee approved the recommendation of the Board of Undergraduate Studies that the formal response to the Computer Science and Computer Systems Engineering Periodic Review report from the Department of Computer Science be revised to include further details of the steps that will be taken to implement the recommendations of the report and a suggested time frame in which they will be carried out.

CONSIDERED:

A revised response from the Department of Computer Science on the Periodic Course Review (paper BFS26/02-03).

RECOMMENDED:

That the revised Periodic Course Review response from the Department of Computer Science be approved as set out in paper BFS26/02-03, noting the following:

- (iv) That work had been done to further align exam regulations between Computer Science and the Warwick Business School, and that there were plans in place to monitor the outcomes.
- (v) That the Board felt that when considering the distribution of degree results by course, particularly for Joint Degrees, it was also necessary to take into account the quality of the student intake.

(c) Annual Course Reviews (minute 28/02-03 refers)

REPORTED:

- (i) That at the meeting of the Academic and Quality Standards Committee held on 26 February 2003 (minute 47/02-03 refers) at which Annual Course Reviews submitted by all Faculty Boards were considered, it was resolved:
 - (A) That a pro-forma for Annual Course Review reports be brought forward to the next meeting of the Committee.
 - (B) That from 2002-03 Faculty Board Secretaries produce a composite report on Annual Course Review reports identifying best practice and areas of concern.

- (C) That clarification be provided of the mechanism for following up with departments and reporting to the Committee areas of concern highlighted in Annual Course Review reports.
 - (D) That it be noted that it was the expectation of the Committee that areas of concern be addressed at Faculty level, unless an issue of principle was revised and that, to this end, the Committee expected to receive a report from the BFSS in the Summer Term on the issues raised in connection with the MSc Management Science & Operational Research.
- (ii) That at the last meeting the Board resolved that it be noted that some departments in the Faculty had both a Senior Tutor within the department as well as an Undergraduate Course Director while in some departments one person performed both roles, and that further guidance in this area should be sought from the Senior Tutor's Office.
 - (iii) That following consultation with the Senior Tutor, it was noted that it was not required to have separate departmental Senior Tutors and Directors of Studies within a department, as long as both functions are being covered, noting however that the Senior Tutor's Office does request one named contact person per department.

CONSIDERED:

The following Annual Course Reviews which were not considered at the last meeting:

- (iv) Computer Science 2001/02 (BFS27/02-03)
- (v) Computer Systems Engineering 2001/02 (BFS28/02-03)
- (vi) Computer and Business Studies 2001/02 (BFS29/02-03)

RESOLVED:

That the following Annual Course Reviews from the Department of Computer Science as set out in papers BFS27-29/02-03 be approved:

- (vii) Computer Science 2001/02
- (viii) Computer Systems Engineering 2001/02

39/02-03 Checklist for Quality Assurance

REPORTED:

That Departments would receive within the next few weeks information about the forthcoming Institutional Audit and a quality checklist from the Senior Assistant Registrar (Quality), noting that responses would be sought by the end of July and that the intention behind the checklist was to help departments in preparing for Audit, contribute towards central co-ordination of information required by the Quality Task Group and facilitate the effective sharing of best practice in areas where the Teaching Quality team intended to produce Good Practice Guides over the summer vacation.

40/02-03 Report from the Sub-Faculty

RECEIVED:

- (a) The minutes of the meetings of the Sub-Faculty held on 7 May 2003.
- (b) An oral report from the Chair of the Sub-Faculty.

RESOLVED:

- (c) That it be noted that the current times of meetings within the single-cycle structure proved to be problematic for the Sub-Faculty of Science as it resulted in very little business for the Committee's first meeting but a burdensome load for the Committee's final meeting.
- (d) That it was unfortunate that the Sub-Faculty was not able to consider the undergraduate SSLC summative report this term as the deadline for submission of the end of year SSLC forms was not until after the meeting, however, it recommended the following solution in light of this and (c) above:
 - (i) That SSLCs within the Science Faculty be given an extended deadline for submitting forms to take into account that for many courses within the Faculty, teaching continues as far as week 6 and that students should be able to comment on this full period.
 - (ii) That these SSLC forms should be considered within Departmental meetings over the summer term and issues included in the Department's annual report, as they are now.
 - (iii) That the undergraduate SSLC summative report and forms be submitted to the Autumn Term meeting of the Sub-Faculty and Board coinciding with the Annual Review reports, noting that the SSLC Committee could still consider the Faculty's undergraduate SSLC forms in the summer term if they felt it suitable.
