- (i) That the Teaching Excellent Framework scheduled for 2017 was anticipated to include NSS results as a significant driver of a metric driven approach to assessing excellence.
- (ii) That HEI's in the top 25% of attaining teaching excellence as confirmed by TEF would potentially be able to change their fee rate above the current £9000 cap in line with inflation, with TEF1 being at an institutional level, with the later TEF2 potentially allowing for fees changes to drill down to Departmental level.
- (iii) That initial metrics completed in-house at Warwick suggest that current NSS results would not place Warwick in the top 25%, whilst most other Russell Group institutions will reach that threshold.
- (iv) That further information would be available following the release of the Green Paper later in November 2015.
- (v) That the departments of Physics and Life Sciences should be commended for their improvements in NSS results for 2015.
- (vi) That those departments who had experienced in improvement in NSS had taken actions to improve specific activities to place student experience at the top of the department agenda, such as timeliness and content of feedback on assessed work, clear and open communication of SSLC minutes and actions, ensuring swift, honest and clear responses to student queries, and improving the accessibility of academic staff to students.
- (vii) That ensuring improving, or consistently high NSS results year on year required constant development and improvements by departments.

RECOMMENDED (by the Chair):

- (viii) That all departments should consider actions for improving NSS results as a key priority in light of TEF.
- (ix) That departments who had attained high NSS results for 2015 should avoid complacency and work to ensure continued success with NSS in future years.
- (x) That those departments who had experience lower, or drops in NSS results for 2015 should consider future actions for improvement as a matter of urgency.

- (iii) That the UG and PG combined data showed a compliance rate of 81% for the term 3 reporting period, representing a 5% drop in compliance from term 3 in 2013/2014.
- (iv) (By Professor N Stocks) That reductions in compliance in the School of Engineering for term 3 had been caused by technical difficulties with the electronic submission of assessed work and feedback to students, and this matter was being resolved for the future.
- (v) (By Professor S Banerji) That the use of external markers and tutors for WMG modules had resulted in a drop in compliance in WMG for term 3, and that work was being done to ensure that in future external tutors were fully aware of and adhere to University of Warwick guidelines for the provision of feedback on assessed work.
