

12a - ResNet cable connection

What do I need to connect?

All residential rooms have an ethernet network port where you can connect a computer to the ResNet residential network.

To connect via cable to the ResNet, you will need a desktop or laptop with a network adapter and an RJ45 (ethernet) network cable.

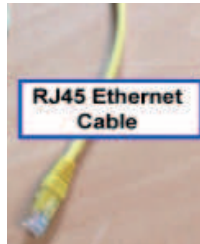

Other devices such as hubs & routers are not allowed.

How can I tell if my computer has a network (Ethernet) adapter?

The network port on your laptop or pc may appear next to an icon representing 3 computers connected together.

Plug one end of the network cable into the network port on your computer and the other end into the wall outlet in your room.

Ensure it is connected firmly. You have now established a physical connection to the network.

Read the Acceptable Use Policy

You are responsible for all activity originating from any machine using the network connection provided in your room. In addition to this general responsibility, please read the Acceptable Use Policy which can be found at:

<https://warwick.ac.uk/services/its/servicessupport/networkservices/resnet/rules/aup/>

For general information about the ResNet service, go to

<https://warwick.ac.uk/resnet>

What should I do if I need help?

Room connection issues, phone from the room with the computer switched on. Phone **024 765 75000** (or extension 75000).

Visit the **IT Services Help Desk Drop in Centre** - 1st floor of the Library - 9am – 5.30pm weekdays.

For non-urgent queries, log a request via our online Helpdesk at:
