### Printing – Personal laptops - Ubuntu

### How do I install Kyocera on Ubuntu?

Before you install the Kyocera print queue you will need to download the drivers - click the link below which will download them:

https://warwick.ac.uk/services/its/servicessupport/printing/unixprinting/Linux 8.1605 TA...5052 6052ci.zip

8.4

# Linux

Linux PPDs

6

1.18 MB Linux\_PPDs\_TASKalfa3050.zip

WARWICK

When the drivers are downloaded, open System Settings. click on Printing and then select Add.

🧧 💿 🐵 Printing - localhos	t .	
🙅 Add 👻 😋	Filter: 🔍	08
There are no printers config	jured yet.	
Add		
Connected to localhost		

#### In the Network Printer options select Windows Printer via SAMBA.

Enter the following information

(server). ads.warwick.ac.uk\kyocera

You will need to replace (server) with Foster or Hopkins.

Select Set authentication details now and enter your username and password:

Username: ads.warwick.ac.uk\(username) Enter your IT Services password and press Forward.

### Select the print driver

Select the option **Provide PPD** file in the Choose Driver screen and then browse to the driver file.

Choose the Kyocera TASKalfa 6052ci.PPD Then click Forward
