

VIVATECH

| 14TH – 17TH JUNE 2023 |

One of the largest tech conferences in the world with:

- 150,000 + visitors
- 11,400 Startups
- 919,000,000 people reached over social networks
- 6,000,000,000 Impressions on social media

Key Speakers consisted of Elon Musk, President of France - Emmanuel Macron, and hundreds of CEOs or high positionalary leaders from large companies such as Google, Microsoft LVMH.

I spent hours talking to professionals from various industries ranging from tech to finance to medicine to build up my knowledge base and expand on my connections. I listened in on various talks from well-known and established tech leaders hearing their story and their thoughts on various different topics such as generative AI, web3 and equality in different sectors.

ACADEMIC BENEFITS

Taught me industry standards; allowed me to understand the trends in technology and its application in other industries

CHALLENGES

The main challenges I faced was my inability to speak French and being vegetarian. I learn various French phrases and words prior and yet there were still many challenges in that regard. Secondly, finding vegetarian french food was more of a challenge then expected.

FUN FACTS

To see Elon Musk I had to wait 3 hours prior where I made various friends from univeristies in the US and Canada
