Digital Healthcare Science (BSc) (Full-Time, 2020 Entry)
Warwick University, 1 of the UK’s top universities, offers Digital Healthcare Science. Combine the scientific skills and values of decisions making, consultation and clinical physiology. While focusing on the skills required for working with medical digital technologies.

What sort of careers could I go into afterwards? Is it likely to be more tech-based?

The range of careers is very wide since you will learn different skills, such as, data analysis, system evaluation, digital aspects of technology involved in healthcare. But you will not be a technical expert, for example, there is no programming in the course.
Furthermore, you will learn how to conduct research. So some of the careers you could apply for after graduation could be, data analyst, research assistant, technology developer, etc.

Thank you

Is it possible to take internships as part of the course?
