EXPERIENCING PHILOSOPHY AT WARWICK

Does the world make you wonder? Do you wonder why it’s one way and not another? Do you wonder if the world could be changed for the better?

Satisfy your curiosity by studying Philosophy at Warwick.

We’re an inclusive staff and student community in which you’ll find it easy to share views, challenge perceptions and take intellectual risks.

Our department is driven by highly regarded research, which means you’ll benefit from teaching informed by the most advanced understanding of the subject. We support diverse philosophical traditions, with strong interests in both analytic and continental philosophy. As a result, we offer a broad take on the discipline, allowing you to choose from a varied range of modules and tailor your learning to what interests you most.

Whichever topics you choose to study, you’ll be challenged by a rigorous, but rewarding, learning experience. You’ll benefit from a mix of traditional and innovative approaches to teaching, and be able to draw on an extensive, dedicated support for your learning outside of the classroom. You’ll also have opportunities to conduct your own research.

Our goal is to empower you to make a difference in the world by supporting you to become an independent, creative and effective thinker.

“WONDER IS ONLY THE BEGINNING OF PHILOSOPHY.”

Socrates in Plato’s Theaetetus

HOW YOU’LL LEARN

OUR TEACHING APPROACH

Through a variety of teaching methods, you’ll encounter a wide range of areas and traditions of philosophy. Some of our modules will introduce you to the key works from the history of philosophy, while thematically organised modules will focus on contemporary treatments of philosophical problems. Recent modules have looked at the good life and the ethics of sociability, terrorism and conspiracy theories, and making difficult decisions, for example.

Importantly, you will also begin to ‘do philosophy’. You’ll be exposed to good craftsmanship and get regular practice in reading, interpreting, debating about and arguing with texts, philosophers and theories. Lectures provide information, analysis and argument about particular philosophical positions, as well as time for questions and some discussion. Seminars are an opportunity to cement and further your learning through interactive group discussion, debates, and exchange of ideas and learning in a small group. Your seminar tutor will set the format and guide the discussion, making sure everyone gets a say and prompting healthy debate. You may take it in turns to begin the discussion with a presentation, be set some questions to consider beforehand or approach a specific task as a group.

HOW YOU’LL BE ASSESSED

Modules are assessed mainly through a mix of exams and essays, and you’ll get extensive feedback to help you progress. Some modules involve other modes of assessment, including group work, video assignments or oral presentations. Regular feedback throughout the year will provide you with invaluable advice to ensure that you are equipped to succeed on your degree, whilst providing you with ideas about how to further develop your skills.

Lecturers and seminar teachers are available outside of class to give advice on your assignments, and on other matters related to their module. They will also give you feedback on your essays to help you improve both your writing and your philosophical engagement with topics.

At Warwick, you will be part of a supportive and enthusiastic community of philosophy students who often discuss philosophical ideas outside of class and offer study support and mentorship to fellow students. You will also get academic support from your lecturers and seminar leaders, who are experts in their field and therefore the best placed to introduce you to their area of philosophy.

OUR COURSES

Flexibility and choice are key features of our philosophy courses. You’ll have a lot of freedom to choose your own path through the subject and will have the opportunity to explore our strengths in both analytic philosophy and continental philosophy. You can also complete your degree with a dissertation on a topic of your own, developed and agreed in discussion with your supervisor.

In all of our courses, the first year aims to hone your ability to critically argue and complete well-structured analytical essays and other assignments on philosophical readings. We’ll help you master the fundamentals block by block, from reading to understanding, outlining key concepts, detecting patterns of argument, and preparing for assessments. Our first year is designed in such a way that if you have not studied philosophy before you are not at a disadvantage.

From here, your degree will be defined by the course, pathway and modules you choose.

“If I could sum up the Philosophy course at Warwick in one word it would be... modern. I found that unlike some institutions that tend to focus only on the typical Plato and Aristotle type modules, Warwick gives you the opportunity to intertwine philosophy with your everyday life. One of my favourite modules was ‘Philosophy through film’ which involved investigating whether films could actually do philosophy. Although we didn’t get to swap lectures for film screenings we had fun movie nights, thoughtful debates and eventually created our own short films which is less daunting than it sounds. Our lecturers encourage us to genuinely investigate the aspects of philosophy that interests us so that we are constantly interested in what we study and keen to contribute our own ideas.”

ORAY
BA PHILOSOPHY
YOUR CHOICE OF DEGREES

BA PHILOSOPHY
A level: AAB / IB: 36

Our single honours degree will enable you to wrestle with fundamental questions about the world and our understanding of it, and about ethical questions related to how we should live. You'll not only learn about philosophical topics, but you'll also develop the skills required to engage actively with those topics, in a vibrant and supportive academic community.

We emphasise the study of philosophy's core traditions (e.g. in the works of Plato, Aristotle, Descartes, Hume and Kant) as a background to understanding and critically interrogating more recent philosophical questions and concerns. In your second and third years, we give you even greater freedom to choose your own path through the subject, selecting from an exceptionally broad range of module topics; these currently include Hegel, Nietzsche, Sartre, Ethics of Sociability, Film, Aesthetics, Feminism, Time, Terrorism and Mind. Throughout your degree you will also have the opportunity to take modules from outside of the department, tailoring your degree to what interests you.

Our students benefit from expert guidance from staff in developing strong analytical and critical skills alongside the ability to integrate large bodies of information involving multiple perspectives.

FIRST YEAR

In your first year, you'll gain a solid grounding in philosophy and its history, and familiarity with an unusually broad range of philosophical questions. You'll also develop proficiency in the close reading of complex texts and the preparation of well-crafted assignments. Throughout your time with us, we'll support you in improving your philosophical abilities and your knowledge of the subject.

You'll take six core modules in your first year:
- Reason, Argument and Analysis
- Key Debates in Moral and Political Philosophy
- Mind and Reality
- Plato and Descartes
- Logic I: Introduction to Symbolic Logic
- Ancient Philosophy

You'll combine these core modules with one or two optional modules within the department or from other departments if you wish.

SECOND AND THIRD YEAR

In your second and third years, we'll help you to deepen your philosophical knowledge and skills through a wide range of more specialised optional modules. Through engaging in depth with specific topics and thinkers, you'll learn how to closely read and analyse philosophical texts and other literature, and to think and write clearly. Our academics produce world-leading research in both analytic and continental philosophy, as well as in interdisciplinary work involving psychology, mathematics, and literature. Because we are involved in teaching at all levels, you are learning from individuals at the forefront of their fields from day one.

You'll take one core double module in your second year:
- History of Modern Philosophy

You'll then choose from a vast selection of optional modules.

In your final year there are no core modules so you'll have the flexibility to choose all your modules.

“My favourite modules in philosophy were Applied Ethics, Feminism and Crime & Punishment. I loved being able to apply traditional theories to real practices in the world today. I particularly enjoyed the seminars in these subjects because I felt really engaged and liked the informal debates that we had. The lecturers always had time for me and are all experts with a huge interest in their field. Finally, I always felt supported in the Philosophy department, from all members of staff and students- I couldn’t have asked for better!”

NICOLE
BA PHILOSOPHY WITH PSYCHOLOGY
BA PHILOSOPHY WITH PSYCHOLOGY

Entry requirements: A level: AAB / IB: 36

What are minds and how do they work? What explains the objective character of thought, the fact that thoughts can be true or false? Can the subjective character of experience be explained scientifically? What makes other peoples’ minds and actions intelligible to us? Addressing questions such as these requires both insights into mechanisms from psychology, and facing conceptual challenges in philosophy.

If you have an interest in the theoretical and philosophical aspects of psychology, or if you want to understand how actions are produced and what minds are for, our BA Philosophy with Psychology could be the degree for you.

Throughout this degree, you’ll focus on minds and actions: the mechanisms and structures, biological, cognitive and social, which underpin them; their development and evolution; the reasons they vary between individuals and species; and their complex relations with culture.

We are unique in having many lecturers who are experts in philosophical psychology, and several lecturers whose published research includes both aspects of psychology, or if you want to understand how actions are produced and what minds are for, our BA Philosophy with Psychology could be the degree for you.

You’ll choose from a vast selection of optional modules.

THIRD YEAR
In your final year there are no core modules. You’ll choose optional modules from a range of modules from both departments. You also have the choice to take some of your optional modules from another department.

Please note: Philosophy with Psychology is not BPA accredited as a route into clinical psychology.

BA PHILOSOPHY AND LITERATURE

Entry requirements: A Level: AAB to include A in English Literature or English Language and Literature. IB: 36 to include 6 in Higher Level English Literature or English Language and Literature.

This is a degree for students interested in philosophy and literature and how they relate to each other. It gives you the opportunity to study the two subjects, each with distinctive traditions and lively contemporary scholarship, and to consider how these two fields matter to each other: are they in conflict, as Plato suggested? Do they complement, or even need one another? What can we learn about ourselves by having the goals, methods and problems of both fields in view and considering how they ‘speak to’ each other?

Some of the central themes and questions concern the way we express ourselves – what concrete form do we give to our thoughts and experience? We consider how the diverse human capacities for imagination, emotion, and reason can be relevant to truth-seeking.

And very broadly, we are interested in the goals and values that are at work in philosophy and literature: what are the projects and challenges that show up as worthwhile in these practices? We bring philosophy and literature together in the classroom. At key points in the degree you will be jointly taught by faculty from the Philosophy and the English and Comparative Literary Studies Departments. Though the particular thinkers and texts studied vary, these are some of the figures you might encounter: Friedrich Nietzsche, Virginia Woolf, Jean-Jacques Rousseau, Toni Morrison, Walter Benjamin, J. M. Coetzee, Emily Dickinson, William Wordsworth, Fernando Pessoa and Jorge Luis Borges. You will also have a chance to write on a philosophy and literature topic of your choice, bringing together authors and questions that you find challenging. This degree encourages you to learn about these fields in depth and to develop your own understanding of what is important in the relationship between philosophy and literature.

FIRST YEAR
In your first year you’ll study three core modules:
• Problems in Philosophy and Literature
• Modes of Reading
• Introduction to Philosophy

As there are only three core modules you can shape your course from year one, choosing up to three of your modules from six options.

SECOND AND THIRD YEAR
You only have one core module in your second year which is History of Modern Philosophy. You’ll then choose from a range of modules from both English and Philosophy departments. The same applies in your third year where your only core module is Textual Studies. Again, you’ll study modules from both departments but will also have the opportunity to choose modules from other departments.
The BSc in Mathematics and Philosophy provides the opportunity to study both subjects in depth while also exploring how they are related through logic and philosophy of mathematics. In addition to Mind and Reality and Symbolic Logic during your first year, you'll also take core mathematics modules in analysis, geometry, abstract algebra, and probability which will prepare you for more advanced work in mathematics.

In your honours years you’ll explore further topics in logic – such as Gödel’s completeness and incompleteness theorems, set theory, modal operators, Turing machines, undecidable problems, computational complexity – as well as having the opportunity to consider related philosophical questions – e.g. how can we escape from the logical paradoxes? What is a mathematical proof? Are there true but unprovable statements? How is mathematics related to computation and to the empirical sciences?

In your first year you’ll take nine core modules:
- Mind and Reality
- Logic I: Introduction to Symbolic Logic
- Linear Algebra
- Differential Equations
- Geometry and Motion
- Foundations
- Introduction to Abstract Algebra
- Analysis
- Probability A

This degree is for students eager to combine study of philosophy, literature, language and culture from the ancient to the modern world. The subjects of Philosophy, English Literature and Classics share a rich history, such that knowledge in one subject deepens and enlivens understanding in the others. Students on this degree can learn, for instance, about Plato as a thinker, writer and cultural influence; they can study myths from the ancient world that are still powerful today; they can study ethical ideas expressed in literature, theoretical argument and cultural practices from ancient Greece up to the current moment.

This degree is distinctive in giving students to access to all three departments. You will be able to take modules that link the subjects in various ways, and you will also have great freedom to develop subject-specific interests – you could study not only ancient philosophy and epic poetry, but also archaeology, philosophy of mind and contemporary literary theory. The first year includes study of ancient Greek or Latin, and there are jointly taught modules in Years 1 and 3 that focus on texts that cross subject-boundaries and address questions about how the subjects relate.
INTEGRATED: STUDY ABROAD INCLUDED WITHIN YOUR THREE YEAR DEGREE

An integrated year allows you to replace year two of your programme with a year abroad. The marks you earn will count as the second year of your final degree results.

INTERCALATED: STUDY ABROAD ADDING A YEAR TO YOUR DEGREE

The intercalated option will add one year to your degree programme. Typically students apply in their second year of study to go abroad for a third year of study at a European institution. Students then return to Warwick for their final year. Warwick also has university-wide partnerships with universities all around the world. Each year the Philosophy department is allocated a number of places on these exchanges to which you can apply. Find out more at warwick.ac.uk/studyabroad

Undergraduate students doing Single or Joint-honours Philosophy programmes can also set up an approved work placement at home or abroad.

You’ll find great reward from studying abroad, whether you opt for an integrated or intercalated year. Our department is part of a global network of exchange partners, enabling you to spend time studying in another country during your time with us. We have long-standing agreements with prestigious universities in countries around the world.

Below is an example list of places that were open to our students in 2018/19. The list is illustrative of what might be on offer in future years, as places and availability are always subject to change on an annual basis.

**Integrated country options**
- Canada - Queen’s University in Ontario; Western University in Ontario
- USA - University of Wisconsin-Madison

**Intercalated country options**
- Europe - Our department has partners in France, Spain, Italy, Germany, Netherlands, Austria, Denmark and more. You can choose from amongst the finest universities in Europe in cities such as: Madrid, Dijon, Rome, Köln, Vienna and Copenhagen.
- Australia - Monash University (Melbourne campus).
- Malaysia - Monash University (Selangor campus).
- Japan - If you’re interested in Japan, you can apply for options such as: University of Tokyo or Hokkaido University.
- China - Tsinghua University.

TAKE AN INTERNATIONAL PERSPECTIVE

“
BE LOVED,
BE ADMired,
BE NECESSARY;
BE SOMEBODY.”
SIMONE DE BEAUVOIR
By studying Philosophy at Warwick, you’ll develop a skillset to prepare you for careers that value fresh, creative, critical thinking. From the point of view of graduate recruiters, philosophy is well-known and well-regarded as a subject, so the range of opportunities is very wide. Recent graduates have progressed into research, consultancy, marketing, local government, human resources, construction management, the IT industry, public relations and the arts.

Employers tell us that they like philosophy graduates because they can:

• Formulate complex problems
• Articulate clearly the underlying and complex issues of debates
• Analyse
• Pay attention to detail
• Think clearly in the abstract and construct sound arguments
• Consider social and ethical issues in a structured way
• Find and articulate evidence of their skills more effectively than many students
• Be rigorously logical
• Influence ideas and decisions

WHERE CAN PHILOSOPHY TAKE YOU?

WHERE PHILOSOPHY TOOK ONE OF OUR GRADUATES...

“Following my degree I went on to coach basketball around the UK through Midnight Madness and The London School of Basketball, two organisations that aim to create change in young people through sport. Midnight Madness, for example, started opening gyms at night for competitions to get young people off the streets causing trouble. In this process they recruit a nationwide Midnight Madness team that competes with teams around the world.

Following this, I worked as a learning support assistant with students with special educational needs and then as a teacher in an inner London school. Today I work as a Head of Humanities in Harris Academy Peckham, where I lead a team of teachers of RE, history, geography, psychology, sociology, media, law, citizenship and health and social care. I also hold some pastoral roles helping to raise attainment of our students who may find it challenging to engage with the curriculum, have attendance issues or need encouragement regarding exam stress, homework, etc. Alongside this I run a project at the school called WORD, which aims to refine an explicit approach to the teaching of literacy across the school and encourage a pride in writing, oracy, reading and development from our students.

The job is fantastic. The children love learning philosophy. Due to them coming from a plethora of nationalities and faiths, debates can become lively and perceptive. Highlights of such work include seeing students go on to university and a yearly trip that I manage, where Peckham children work in a French monastery for a week, with an Ecumenical community of young people from around the world.”

JOE
HEAD OF HUMANITIES, HARRIS ACADEMY, PECKHAM BA PHILOSOPHY

“How small a thought it takes to fill a whole life!”
LUDWIG WITTGENSTEIN
OUR STUDENTS

“Whether you’re into applying philosophy in a wider educational setting or grappling with Kant’s ‘Critique of Pure Reason’ there are a wide range of modules you can choose. One thing which really stands out to me is the fact that research talks are constantly being advertised in the department, whether this is from professors or our very own postgraduates.

Everyone in the department is super friendly. The department provides advice on how to write essays and they put your academic success on the top of their priority list. I really feel that the advice given on how to write essays is useful for all students, with staff even offering to go through all the essays I wrote during the first and second year. Academic support in the department is coupled with the opportunity to attend end of term parties in addition to the Philosophy Society’s events.

SARA
BA PHILOSOPHY WITH PSYCHOLOGY

“It’s easy to get involved with the Philosophy Society, which always welcomes new members. At the start of term they hosted a Skype Q&A session with philosopher Peter Singer, which was really well-done, and they often host revision sessions to help with exams. Outside of the society, the philosophy common room is the place to get to know other philosophy students from every year, and talk to anyone about philosophy in general. I’m also a Philosophy Ambassador, which means I help out on offer holder days and introduce people to the department. I also enjoy going to the gym regularly at university. People tend to think that philosophers and philosophy students sit and only focus on training their minds, but we go to the gym and participate in sports just as much as anyone else. Even Plato was a wrestler!”

STEFAN
BA PHILOSOPHY

“Some of my non-philosophy friends say I “don’t seem like a philosophy student”. I think that there is the “myth” that philosophers mainly exist in solitude, reading, and thinking, detached from life. While my degree includes that, I am naturally very sociable; you will see me around campus all the time. I do many things beyond my course - I love going to the theatre, dancing to live music in Leamington pubs, singing and playing guitar, and cooking with friends. By being yourself you will build meaningful friendships, but only by keeping an open mind.”

XITA
BA PHILOSOPHY AND LITERATURE

“What initially drew me to Warwick was the warm and welcoming reception I received from everyone I met on the open day; I could immediately picture myself not only studying here but living here as well. All of the lecturers and academics I spoke to were not only knowledgeable about philosophy but genuinely passionate about it, a quality which I don’t think can be faked. I love studying philosophy because of the intellectual challenge it presents. When I finally have that “light bulb” moment and understand an argument or theory, it’s incredibly rewarding, especially when I am then able to contribute towards a debate in the subject area and develop my own opinion.”

ISABELLA
BA PHILOSOPHY
THE SPACE AND SUPPORT YOU NEED

YOUR PERSONAL TUTOR
You will have a personal tutor who will be a first point of contact for you, offering you guidance and support for your general academic questions and any academic or personal difficulties you might have. They will support your academic development throughout the duration of your programme, and you will meet regularly, discussing, for example, how you are progressing and what you might choose as your optional modules. This means they have a complete picture of your strengths, experiences and skills, and will provide references for you during and beyond your time as a student.

THE DIRECTOR OF STUDENT EXPERIENCE AND PROGRESSION (DSEP)
The DSEP can offer advice on study skills, including how to do well (or even better) in essay writing, assignments or exams, which modules might suit you best, or guidance on internships, careers, and postgraduate study.

YOUR ACADEMIC LIBRARIAN AND LIBRARY HELPDESK
Your Academic Support Librarian will help you to develop information and research skills during your studies and they can offer you training in literature searching, finding and using information, referencing and avoiding plagiarism, and reference management tools. They can help you develop skills to find what you’re looking for quickly, and they can give you techniques for delving into the vast array of resources available to you.

MODULE DIRECTORS
Your module tutors are in charge of your module content, set seminar topic areas, and deliver the main lectures of your module. They can provide specific advice about the subject matter of individual modules along with advice about particular essays and assignments.

SKILLS SESSIONS AND PROGRAMMES
Study skills will be built into your core modules in the first year. In those modules, you will develop skills in close reading, essay writing, exam technique, critical thinking and presentation. We also offer specific sessions for second and third years, directed at honours level assessed work. Warwick also offers the Undergraduate Skills Programme and Academic Writing Programme to help you further develop academic and career-related skills.

STUDENT MENTORS
When you arrive, you will be given a mentor, a current student on your programme who can tell you about their experiences of life and studies at Warwick. These student volunteers can also help guide and support you, give advice and answer questions. We’ve found that new students appreciate the availability of those who are willing to share their experiences with them in this way.
STUDENT LIFE IN WARWICK PHILOSOPHY

We are based right in the heart of campus, next to the library, Arts Centre and near to the main lecture theatres. Our student common room provides free tea and coffee, and acts as a hub for fellow students to gather between lectures.

With such a friendly, active department, you’ll find plenty of things philosophy-related to keep you busy, engaged and sociable. You’ll get the chance to make friends with fellow students, exchange experiences, get advice, and hear interesting perspectives from various speakers and conferences.

OUR SOCIETIES

The Philosophy and the Philosophy and Literature societies are both open to students with a passion for philosophy. The two societies are closely linked and offer peer-support for students, as well as a range of regular socials and speakers throughout the year.

“The Philosophy Society is led by students and is a community where philosophy students come together to share, debate, and develop their interests. We want to make you part of the Warwick community and help you make lasting friendships.”

QAYOM
PRESIDENT OF WARWICK PHILOSOPHY SOCIETY

“When I first came to Warwick I was impressed by how modern the campus was, and I liked the convenience of all the facilities being within walking distance: university buildings, the library, accommodation halls, bars and cafes, the arts centre and supermarkets.

With all the essential information about the course given, it was easy to get into the new student routine. The workload during the first term wasn’t too huge and I didn’t find it hard to keep up the pace, even though I am an international student and I needed to adapt to the English language as well as studying at university level. As a fresher, I had a student mentor assigned to me who was there to help me with queries that arose during the first term, and the whole year.

It was quite easy to make friends with those I was living with and also with people doing different philosophy degrees. I met many of them in the philosophy common room where students come to share their ideas, study, or enjoy a cup of free coffee/tea. There are also different societies to join, including the Philosophy Society that organises social events, which is a good opportunity to find people that you have something in common with.”

RUGILE
BA PHILOSOPHY WITH PSYCHOLOGY
Whether you’re an undergraduate, postgraduate or member of staff, you’ll be welcomed at our department seminars and other research activities which take place throughout the year. As well as providing opportunities for you to socialise and collaborate, these events will give you the chance to develop valuable skills and networks.

We host a range of fantastic philosophical speakers from across the UK at these seminars and events. Examples of some of the exciting activities that have gone on here in the last year include:

**Minorities and Philosophy (MAP) events** - MAP is a worldwide network that aims to facilitate the participation of underrepresented groups in Philosophy. MAP at Warwick hosts a variety of events including student and staff workshops, coffee mornings and external speakers.

**MindGrad** - This is the world’s leading conference for postgraduate students in the philosophy of mind.

**Philosophy Film Club** - Organises weekly screening of philosophical films.

**Philosophy Open House and Philosophy Question Time** - Evenings of philosophy talks, student and staff socialising, and pizza.

---

**GET MORE FROM YOUR PHILOSOPHY COMMUNITY**

**JOIN THE UNDERGRADUATE RESEARCH COMMUNITY**

You can apply for the Warwick Undergraduate Research Support Scheme. If you are successful, you’ll get a bursary and skills development training to carry out your summer research project, as an addition to your philosophy degree programme. This project is a fantastic opportunity for you to carry out research supervised by an academic member of staff. View some examples of URSS projects which philosophy students have completed at: warwick.ac.uk/urss

**Reinvention** is an open-access, online, peer-reviewed journal, dedicated to the publication of high-quality undergraduate student research. The journal welcomes academic articles from all disciplinary areas and all universities. Students play a strong and active role in this community, and the journal aims to support undergraduate students in their first venture into academic publishing.
