

TOP TEN TIPS TO ACHIEVE A MORE Sustainable Campus

LIGHTS

Turn off all lights when they aren't in use. If you can, study in common areas such as the library where the lights are already on to save electricity.

NOTES

Go paperless! Try digital note-taking on your laptop, tablet, or phone. Encourage your lecturers and seminar tutors to release handouts online before your lectures, seminars, and workshops.

PRINTING

Try to go digital! If you can't, ensure you're printing double sided. Did you know you can fit 2 (or even 6) slides on one page when printing?

RECYCLING

Think before you buy! Reduce the amount of waste you produce. Reuse items as much as you can before replacing them. Recycle items wherever possible.

FOOD

Bring home-made breakfast, lunch, snacks, and dinner on campus. By doing so, you can not only save money but reduce food and plastic waste on campus. To heat up your food use microwaves in common areas.

TRANSPORT

Reduce your carbon footprint and use alternatives to driving such as public transport (try Warwick's Service 14 - the OnDemand bus service), cycling, walking, carpooling, scootering. For more information visit Choose Your Way Warwick.

GREEN SPACES

Whether you fancy a walk or a quiet place to read, explore Warwick's green spaces.

REUSABLES

Use reusable coffee cups and water bottles to reduce waste on campus.

ELECTRONICS

Turn off all electrical equipment such as projectors, computers, microwaves when leaving a room. You have the authority to do so!

GET INVOLVED

Join sustainable societies, volunteer with local green groups, run your own campaign with the SU, participate in the Cut the Flow initiative and many more.
