Traffic Count Location Plan

## Executive Summary

---

The 2009 Section 106 Agreement for the University of Warwick's 10 year Masterplan, requires car movements into and out the University in the AM and PM peaks to be monitored on a regular basis. These traffic movements are then compared to the 2007 levels with the aim of preventing car trips increasing more than 12% over the Masterplan period.

Failure to meet this target would result in the University paying contributions to fund remedial measures.

The University's Travel Plan is the tool being used to manage car movements into and out of the University and encourage car sharing, use of public transport, walking and cycling.

A traffic survey was carried out on Thursday 11<sup>th</sup> November 2010 and Thursday 8<sup>th</sup> November 2012 using video cameras to record movements into and out of the accesses.

The results of the analysis shows that between 2007 and 2010 the two-way car trips to and from the University have fallen in both the AM and PM peaks, with reductions of 18.7% and 21.2% respectively. A further survey was carried out on Thursday 8<sup>th</sup> November 2012 which showed further reductions between 2010 and 2012 in the AM and PM peaks of 3.6% and 8.8% respectively.

Given that the overall activity at the University has not fallen between 2007, 2010 and 2012 these surveys show that the measures introduced as part of the University Travel Plan and the campus residential developments have reduced the number of cars that access the University during the AM and PM peak hours.

The University is currently on course to prevent car trips increasing by more than 12% over the Masterplan period and therefore it is unlikely that the University will have to make any s106 Agreement contributions to remedial measures.

# 1 Introduction

---

The 2009 Section 106 Agreement for The University of Warwick ten year Masterplan, requires traffic flows entering and exiting the University in the AM and PM peaks to be monitored on a regular basis.

The traffic levels are to be compared to the 2007/2008 levels to assess if the target to prevent traffic increasing by more than 12% in car trips in the AM and PM peaks have been met.

Section 2 of this report provides a summary of the traffic data for surveys undertaken in 2007, 2010 and 2012. Section 3 provides the conclusions.

This information will also assist The University in its management of car parking and the promotion of sustainable travel.

## 2 Summary of Traffic Data

---

### 2.1 Traffic Surveys

The traffic data was collected at 13 junctions that cover the access points into the University site within the Masterplan Redline Boundary, see Table 1.

Site	Location
Site 3	Kirby Corner Road / Westwood Campus (Access to car park 14)
Site 4	Kirby Corner Road / Westwood Campus (Access to car park 13)
Site 5	Kirby Corner Road / Westwood Campus (Access to car park 12)
Site 6	Kirby Corner Road / University House (East Access)
Site 7	Kirby Corner Road / University House(West Access)
Site 8	Gibbet Hill Road / University House
Site 9	Gibbet Hill Road / University Road / Scarman Road (RBT)
Site 10	Gibbet Hill Road / Library Rd (Exit Only)
Site 11	Gibbet Hill Road / University Road (exit only)
Site 12	Gibbet Hill Road / Radcliffe (north access to car park)
Site 13	Gibbet Hill Road / Radcliffe (south access to car park)
Site 14	Gibbet Hill Road / Access to car park 2 / Cryfield House (RBT)
Site 15	Gibbet Hill Road / Gibbet Hill Campus

**Table 1: Traffic count locations**

The traffic counts for these locations were originally carried out on Thursday 8<sup>th</sup> November 2007 and repeated on Thursday 11<sup>th</sup> November 2010 and again on Thursday 8<sup>th</sup> November 2012. The 2007 and 2010 traffic data was provided in the previous (2011) report. The 2012 data is included in **Appendix A**.

The 2010 and 2012 traffic surveys also included the University of Warwick sites within the Science Park at locations A – Argent Court and B – Milburn House. Neither of these sites is included within the targets for car parking or traffic generation set out in the Travel Plan and s106 Agreement but have been included in the traffic flow tables for completeness.

The 2012 flows also include pedal cycles and motor cycles; to maintain consistency these have been excluded from the tables in this report but are included in the tables in Appendix A.

The traffic surveys were carried out using video cameras at each location to record all turning movements at the junctions/ accesses.

A plan showing the location of all the surveys is provided in **Appendix B**.

## 2.2 Traffic Flows

This section summarises the traffic survey results from the three years of surveys; 2007, 2010 and 2012.

## 2007 Traffic Flow Summary

**Table 4: 2012 Traffic Flow Summary**

## 2.3 Car Traffic Comparison: 2007, 2010 and 2012

A comparison of the car flows in and out of the University between 2007, 2010 and 2012 at the main access routes in the AM and PM peaks is shown in Figures 1 and 2 below.

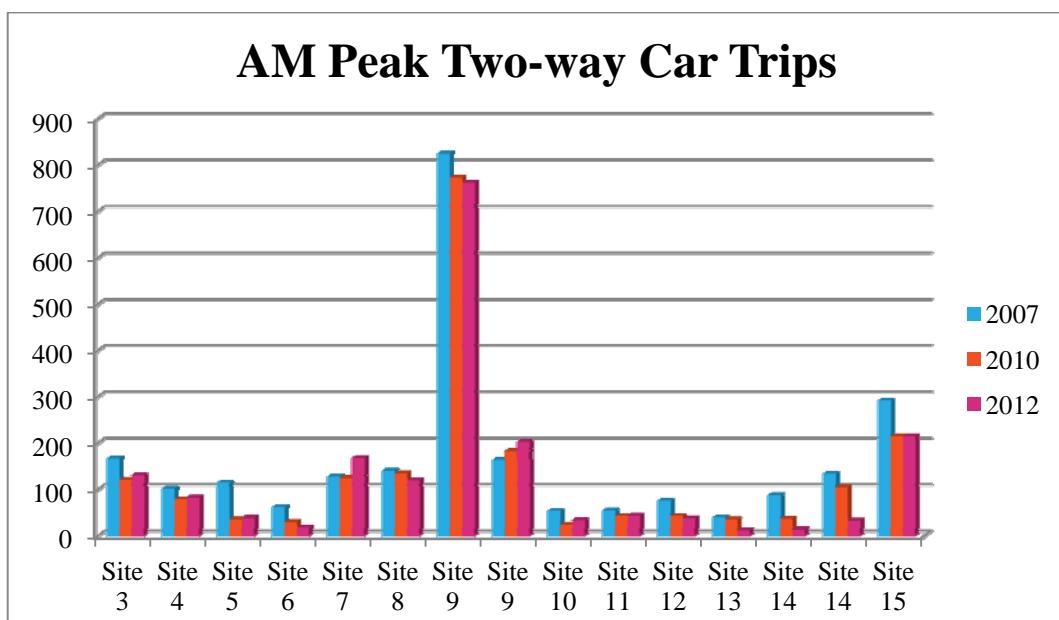

Figure 1: AM peak car flows 2007, 2010 and 2012

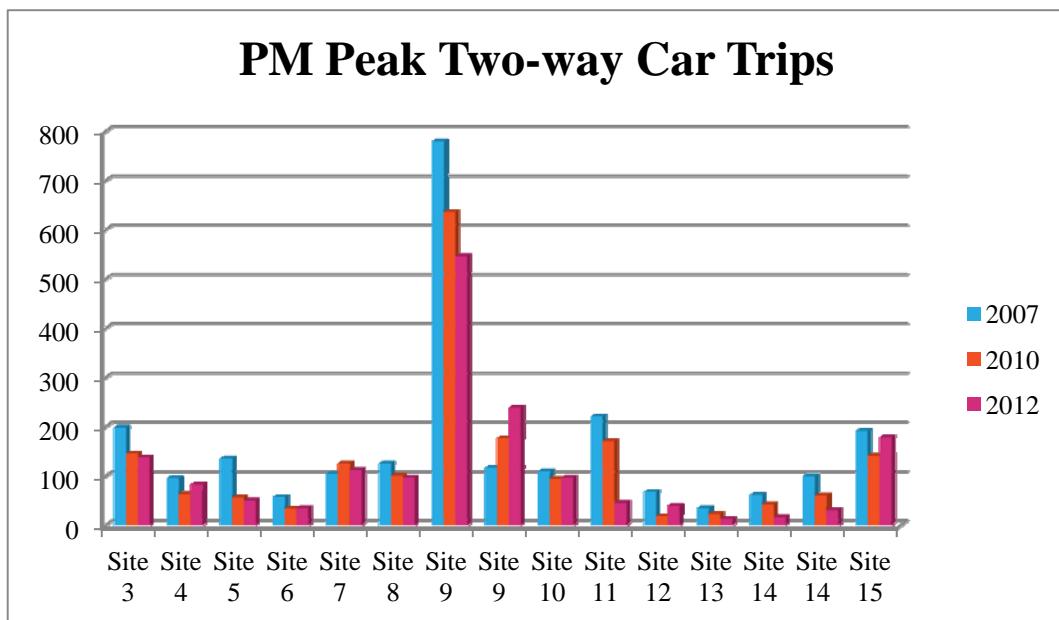

Figure 2: PM peak car flows 2007, 2010 and 2012

Tables 5 and 6 below show that the two-way car trips entering or leaving the University has fallen overall compared to both 2007 and 2010. Compared to 2007 the 2012 flows have only increased for Sites 7 and 9 (Scarman Road) in both the AM and PM peaks.

### 3 Conclusions

---

A comparison of the 2007 and 2010 traffic surveys shows that the two-way car trips to and from the University have fallen in both the AM and PM peaks, with reductions of 18.7% and 21.2% respectively. In the period between 2010 and 2012, further reductions have taken place in both the AM and PM peaks of 3.6% and 8.8% respectively.

If the University facilities which are now located in the Science Park at Argent Court and Milburn House are taken into account for the comparison of the 2007 and 2010 surveys then the two-way car trips into the University have fallen in both AM and PM peaks, with reductions of 15.5% and 18.6% respectively. In the 2012 traffic survey including the Science Park the further reductions in the AM and PM peaks are 3.6% and 8.8% respectively.

Given that the overall activity at the University has not fallen between 2007, 2010 and 2012 these surveys show that the measures introduced as part of the University Travel Plan are reducing the number of cars that access the University during the AM and PM peak hours.

The University is on course to prevent traffic increasing by more than 12% over the Masterplan period and therefore it is unlikely that the University will have to make any s106 Agreement contributions to remedial measures.
