Instagram

List style bio that includes key points and information on collaborations

The screenshot shows the Instagram profile for [_bethology](#). The profile is set to 'Following'. The bio includes the following text and icons:

- Dr Beth | post-PhD life she/her
- Dr, PhD in blood
- PhD tips, science, wellbeing, post-PhD life
- YBA Winner 2023
- Email/DM for collabs
- linktree/_bethology

The bio is followed by a list of posts:

- 295 posts
- 37.8K followers
- 825 following

Below the bio, there are several story highlights represented by circular icons:

- YBA 2023
- Post-doc #1
- Post-doc #2
- Cats
- AMA
- PHD
- Thesis

Red arrows point to the 'Cats' highlight icon and the '295 posts' text.

Twitch

The screenshot shows the Twitch channel page for 'drsimonclark', who has 15.1K followers. The page includes a navigation menu (Home, About, Schedule, Videos, Chat), a bio, and a 'What is going on?' section. The bio describes the creator as a physicist who streams educational content and gaming. Three red arrows point to specific elements: the first points to the bio text, the second points to a 'DONATE HERE' button, and the third points to a 'CHECK OUT MY VIDEOS' button. Below the bio are social media links for Twitter, Instagram, and Book. The right sidebar contains a 'Resubscribe' button and a 'Gift a Sub' button.

About drsimonclark

15.1K followers · **Nebula Stream Team**

I make YouTube videos about science and climate and PhDs, and stream salt, solving maths problems, salt, strategy games, salt, painting Warhammer, and the occasional bit of salt.

What is going on?

Hi! My name is Simon Clark. I have a masters degree in physics from the University of Oxford, and a PhD in atmospheric physics from the University of Exeter. I do two kinds of streams: gaming ones, and educational ones. In my educational streams I go through exam papers as a way of educating people about maths and physics. In these streams I take my time, explain what I'm doing, and hopefully help people preparing for their exams. And if you're just interested in maths and physics, then hopefully I'll also be entertaining background noise for you too :) The gaming streams are your more typical Twitch streams - I just do those because they're fun!
